

SwapJoys Task Report - Pre-Milestone 8 Small Adjustments - May/June 2026

Reference No: N008-SA

No.	Day	Date	Task Name	Billing Hours	Billing Amount (NOK)
1	Thursday	28-May-2026	Small Adjustments sprint kickoff and scope confirmation with client on Discord Review approved scope: Points → Credits rename, homepage copy refresh, removal of "no extra cost" wording (Retail Price field and dual-pricing dropped per client request) Audit existing i18n translation system structure - 1,036 keys across en.json and no.json, 34 sections each Comprehensive mapping of all "Points / points / Point / point" occurrences in en.json (100+ references across 14 sections) Plan value-only rename strategy - preserve JSON keys to maintain component stability (zero .tsx changes needed for translation rename) Verify no database changes required - confirm `point_cost` DB column stays untouched for stability Norwegian linguistic research - confirm "Kreditter" (plural) as the correct Norwegian fintech term, plus compound forms ("Kredittsaldo", "Kredittkostnad") Setup translation parity audit tooling - JSON validation script, missing-key detector, hardcoded-text sweep utility en.json - Layout navigation section (Credits & Balance, Credit Adjustments) en.json - Dashboard section (Credits Balance, Monthly Credits Earned/Spent, View Credits & Balance) en.json - Email Verified, Company Profile, Settings/Profile sections en.json - Initial validation pass and intermediate parity check	12	1,260
2	Friday	29-May-2026	en.json - Marketplace section (Credits display per experience, count labels) en.json - Experiences section (Credit Cost field labels, validation messages, hint text) en.json - Terms & Conditions section rewrite (s1Text, s5Title, s5Text, s7Text) - legal text updates referencing credits-based system en.json - Bookings section (Credits Deducted, Need more credits, Insufficient credits balance) en.json - Points section block (80+ lines, 30+ keys: Credits & Balance page title, Total Credits Earned/Spent, Admin Credit Adjustments, transactions) en.json - Admin Dashboard section (Credits in Circulation, Credits by Company) en.json - Usage Logs and Admin Experiences sections final pass no.json - Layout, Dashboard, Email Verified, Company Profile sections (Kreditter, Kredittsaldo) no.json - Settings, Marketplace, Experiences sections (Kredittkostnad, Norwegian compound noun forms) no.json - Terms & Conditions Norwegian rewrite (kredittbasert system, kampanjekreditter, misbruke kreditter) no.json - Bookings section (Kreditter trukket, flere kreditter, kredittsaldo) no.json - Initial validation pass and key parity check vs en.json	12	1,260
3	Saturday	30-May-2026	Weekend	0	0
4	Sunday	31-May-2026	Weekend	0	0
5	Monday	1-Jun-2026	no.json - Points section block rewrite (80+ Norwegian translation values: Kreditt-transaksjoner, kredittaktivitet, Kredittjusteringer, Kredittbeløp, etc.) no.json - Admin Dashboard, Usage Logs, Admin Experiences sections (Kreditter i omløp, Kreditter per bedrift)	7	735

No.	Day	Date	Task Name	Billing Hours	Billing Amount (NOK)
			Update hardcoded "Points" text in Landing.tsx (5 occurrences without t() function: Welcome Credits, Balance, exchange credits, Available Credits, credits-based system) JSON parsing validation - confirm both en.json and no.json parse without errors; cross-reference parity check (en.json ↔ no.json identical structure, 1,036 keys both sides) t() reference resolution sweep: 922 unique translation calls across 25 React component files verified against translation files - zero missing keys Browser-based QA testing - language toggle EN ↔ NO across all major pages (Landing, Dashboard, Credits & Balance, Marketplace, My Experiences, My Bookings, Admin Companies, Admin Experiences, Admin Usage Logs, Tax Reports) Remove "no extra cost" wording from step3Desc (EN + NO) - audit-found missed spot cleanup, plus homepage hero text refresh and removal of unused titleLight/tagline keys Hero CSS visual polish - new headline accent underline (blue/orange brand gradient), callout-style description with brand-blue left border, responsive breakpoints for tablet and mobile Final audit run - hardcoded text sweep across all .tsx files, JSON validation, key parity confirmation, orphaned-key check Docker production build verification - confirm Vite bundle compiles cleanly inside Docker pipeline Report and invoice preparation, client deliverable packaging		
			Total	31	3,255

Additional Costs (Purchased on Client's Behalf)			
Service	Invoice Date	Amount (USD)	Amount (NOK)*
KVM 2 Hosting (VPS) - Apr 24 to May 24, 2026 - Invoice HCY-24434542	23-Apr-2026	\$17.99	227
Starter Business Email (swapjoys.com) - Apr 26 to May 26, 2026 - Invoice HCY-24434365	23-Apr-2026	\$2.95	33
KVM 2 Hosting (VPS) - May 24 to Jun 24, 2026 - Invoice HCY-25536353	23-May-2026	\$17.99	227
Starter Business Email (swapjoys.com) - May 26 to Jun 26, 2026 - Invoice HCY-25536394	23-May-2026	\$2.95	33
Total Additional Costs		\$41.88	520

Work Summary (What Was Delivered)	
Deliverable	Description
Points → Credits Rename (English)	Complete UI rename across the platform - all user-facing text changed from "Points" to "Credits" in en.json. 100+ translation value updates across 14 sections including Layout navigation, Dashboard, Email Verified, Company Profile, Marketplace, Experiences, Terms & Conditions, Bookings, Points/Credits section (80+ lines), Admin Dashboard, Usage Logs, and Admin Experiences. JSON keys preserved for component stability - zero breaking changes.
Points → Credits Rename (Norwegian)	Complete Norwegian translation rename: "Poeng" → "Kreditter" (plural), "poeng" → "kreditter" (lowercase), plus Norwegian compound noun forms ("Kredittsaldo", "Kredittkostnad", "Kredittjusteringer", "kreditt-transaksjoner", "kredittbasert system", "kampanjekreditter"). Same value-only update pattern applied to no.json across all 14 sections. Linguistic review for natural Norwegian phrasing.

Deliverable	Description
Hardcoded Text Update - Landing.tsx	Updated 5 hardcoded text strings in the legacy Landing.tsx component (not using t() function): "50 Welcome Points" → "50 Welcome Credits", "Balance: 50 Points" → "Balance: 50 Credits", "Your exchange points" → "Your exchange credits", "Available Points" → "Available Credits", "points-based system" → "credits-based system".
"No Extra Cost" Wording Removal	Per client request, removed "at no extra cost" wording from the platform. Initial removal from hero.titleLight on the landing page, plus audit-found cleanup of how.step3Desc which referenced "without additional company cost" (EN) and "uten ekstra kostnad" (NO). Both English and Norwegian versions updated.
Homepage Hero Refresh	Updated homepage hero copy in both languages to reflect the new business positioning - "SwapJoy connects local businesses through employee experiences offered during quieter periods, helping companies motivate employees while using unused capacity more intelligently." Norwegian version: "SwapJoy knytter lokale bedrifter sammen gjennom ansattopplevelser i roligere perioder..." Removed legacy titleLight and tagline keys.
Homepage Hero Visual Polish	Improved hero typography and visual hierarchy: enlarged headline (46px → 58px), added gradient accent underline (brand-blue to brand-orange) below the headline, wrapped description in a callout box with brand-blue left border and subtle gradient background, refined responsive breakpoints for tablet (<900px) and mobile (<600px, <380px).
Translation Parity Audit System	Custom Node.js diagnostic tooling to verify translation integrity: confirms en.json and no.json have identical 1,036-key structure, validates all 922 t() references in 25 React components resolve to existing keys, detects orphaned translation keys, and sweeps for hardcoded English/Norwegian text in JSX. Re-runnable audit script for future translation work.
Cross-Page Language QA	Comprehensive manual QA across 10+ pages in both EN and NO: Landing, Dashboard, Credits & Balance, Transaction History, Marketplace, Experience Detail, My Experiences, My Bookings, Admin Dashboard, Admin Companies, Admin Experiences, Admin Usage Logs (4 tabs), Tax Reports. Verified no raw translation keys leak to UI, no broken layouts from longer Norwegian text, and all language toggle paths work correctly.
Production Build Verification	Docker production build pipeline verification - confirmed Vite bundle compiles cleanly inside the Docker frontend image, nginx configuration loads correctly, and translation JSON files are properly bundled into the production build. Ready for production deployment when client approves rollout.

Invoice Summary		
Item	Details	Amount (NOK)
Development Work	31 hours × NOK 105	3,255
Hosting + Email (4 invoices)	Purchased on client's behalf	520
